DD/A/ODP WEEKLY REPORT

Week of 31 December 1980 - 7 January 1981

I. Major Activities During the Past Week: [   ]   25X1

  25X1   A. Support to PTO: [   ]

CAMS (COMIREX Automated Management System) All programming
and unit testing has been completed for Dual Mode. Module testing
remains to be completed on two modules. Module testing is
expected to be completed in time for Release 81-1 which is sche-
25X1   duled for 11 January. [   ]

The Dual Mode system/interface test is progressing. The ini-
tial tasking messages were generated and transmitted to the West
Coast. To date no major problems have been encountered. The sys-
tem test has been rescheduled to be completed 1 1/2 months earlier
to support a 1 March launch of the Dual Mode System. [   ]   25X1
25X1 [   ]

The MATRIX camera was installed in the 1D16 graphics area.
The unit produces hardcopy colorgraphics from the RAMTEK and AED
colorgraphic terminals. RAMTEK is scheduled to make a final
checkout of the unit this week. [   ]   25X1

B. Support to the Community: [   ]   25X1

REGISTRY (The IC Staff Registry System) The COMREG GIM-II
data base went into production on Monday, 5 January 1981. [   ]   25X1
25X1 [   ], ICS ADP liaison, is giving on-site assistance to the cus-
25X1 tomer. [   ]

25X1   C. Support to OF: [   ]

ACTUARY (Actuarial reports on Agency retirement system) The
projection report to support the five-year Actuary Study has been
produced and delivered to the Office of Government Finance, Trea-
sury Department, and CIA Office of Finance. [   ]   25X1

[   ]   25X1

25X1

D. Support to OSWR: ☐

TADS (Telemetry Analysis Display System) The latest stress test shows that TADS, after re-entrant code implementation, is twice as fast as it was on the IBM 360. ☐   25X1

25X1

E. Support to OPPPM: ☐

PERINSUR (Production processing support by Production Div.) A benchmark of the Microdata 8000 series minicomputer was performed by B Division and Engineering Division personnel at the vendor's site. Results with fifteen simulated terminals showed records processed every 30 seconds. These results are 5-6 times faster than results obtained on the Ames Bldg. 6000 minicomputer. A third benchmark of a 6000 with more memory will be performed this week. Following analysis of benchmark results, Engineering Division will recommend the configuration for the PERINSUR application. ☐

25X1

25X1

E. Support to ODP: ☐

PRISM/PAR (ODP resource accounting systems) The October PAR report was completed and mailed to users. The November PAR reports have been processed and are being checked out by Management Staff. If November's PAR checks out, we will start processing December's PAR. ☐

25X1

II. PROBLEMS:

The CONIF Input Group reported that their COMTEN5 terminals were unavailable for six hours on 22 December 1980. ☐   25X1

25X1 ☐

III. PERSONNEL ITEMS:

25X1 ☐ has returned to A Division for his second co-op tour.

His address: 2D0105 (1G34) Hdqs. ☐   25X1

25X1 ☐ converted from co-op status to regular staff in B Division, effective 29 December 19801.

25X1 His address: ☐

25X1 ☐ have returned to B Divison for their next co-op tours.

25X1 Their address: ☐
